

ADITYA THAKUR

FULL STACK DEVELOPER | AI-POWERED WEB APPLICATIONS | PRODUCT ENGINEERING

SRM Institute of Science and Technology, Kattankulatham

adityabt24@gmail.com | at4420@srmist.edu.in | +91 78992 10719 | LinkedIn Profile | GitHub Profile | Portfolio

PROFILE

Full-stack developer and final-year B.Tech student in Electronics & Computer Engineering at SRMIST, with experience across 2 internships and 10+ deployed full-stack applications spanning scalable web systems and AI-powered products. Skilled in React, TypeScript, Next.js, Node.js, Express.js, and MongoDB, with expertise in RESTful API development, JWT authentication, and modular full-stack architectures. Experienced in integrating LLM-powered features using Groq, Gemini, Claude, and OpenAI APIs, supported by strong foundations in OOPS, DSA and Software Engineering principles. Seeking full-stack and product engineering opportunities with a focus on Generative AI and emerging Agentic AI systems.

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Framer Motion, Vite

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, API Integration

Databases: MongoDB, Mongoose, SQL

AI & APIs: Groq API, Gemini API, Claude API, OpenAI API, LLM Integration

Tools: Git, GitHub, Docker, Postman, Vercel, Render, Railway

CS Fundamentals: DSA, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

WORK EXPERIENCE / INTERNSHIPS

Web Developer Intern (Full Stack Development)

December 2025 – January 2026

Bellwether Business Solutions Pvt Ltd [Completion Letter]

- Migrated a production React.js codebase from JavaScript to TypeScript across 20+ frontend components, improving type safety, maintainability, and long-term scalability across the application.
- Developed frontend workflows for a decentralized identity platform using React and TypeScript, implementing onboarding, profile management, and JWT-based authentication for 2 user roles (individuals and organizations).

MERN Stack Developer Intern (Full Stack Development)

March 2026 – May 2026

Xyzon Innovations Pvt. Ltd.

- Developed and deployed 30+ full-stack features using React.js, Node.js, Express.js, and MongoDB, covering frontend interfaces, RESTful API development, database integration, and secure JWT-based authentication workflows.
- Enhanced application performance and user experience through lazy loading, code splitting, and component-level optimization within a structured MERN development environment.

PROJECTS

Bovision: AI-Powered Cattle Breed Classification System [BOVISION]

Python, Flask, ResNet50, AGPN, MVFF, OpenCV, Grad-CAM, Computer Vision, Deep Learning

- Engineered a deep learning cattle breed classification system using ResNet50 + AGPN + MVFF, achieving 96.25% peak validation accuracy across 5 breeds from a custom 1,208-image dataset.
- Deployed as a production Flask application with Grad-CAM explainability, bridging research-grade ML with a user-facing web interface.
- Authored and submitted a research paper on deep learning-based cattle breed classification leveraging computer vision and explainable AI techniques.

AI-Integrated Portfolio Website [Portfolio Website]

React, TypeScript, Vite, Tailwind CSS, Framer Motion, Groq API, Node.js, Express.js

- Built a multi-page AI-integrated developer portfolio using React, TypeScript, Vite, and Framer Motion, featuring a custom design system, adaptive theming, and motion design built from scratch.
- Integrated a Groq-powered LLM assistant that allows recruiters to explore projects, skills, and experience through conversational interactions.

Decentralized Identity Web Platform (Bellwether Project)

React, TypeScript, JavaScript, Web3, Blockchain, Decentralized Identity, Authentication

- Contributed to a production-grade decentralized identity platform, implementing authentication, onboarding, and identity verification workflows for 2 user roles (individuals and organizations).
- Migrated the React frontend from JavaScript to TypeScript across 20+ components, improving type safety, maintainability, and scalability of the production codebase.

AlgoQuizr: DSA Quiz Platform [AlgoQuizr]

React, TypeScript, Node.js, Express.js, MongoDB, JWT, REST APIs, Vite

- Built a full-stack DSA quiz platform covering 8+ core DSA topics, featuring topic-focused quizzes, responsive design, and an interactive real-time progress tracking dashboard.
- Implemented JWT-based authentication, protected user dashboards, Express.js REST APIs, and MongoDB data persistence to support end-to-end quiz management and user progress tracking.

EDUCATION

SRM Institute of Science and Technology

B.Tech in Electronics & Computer Engineering CGPA: 8.82 / 10

2023–2027

PSBB Learning Leadership Academy

2020–2023

Class X (CBSE): 93.8% Class XII (CBSE): 75.4%

CERTIFICATIONS

- Generative AI Fundamentals – Databricks (Feb 2026)
- Data Analytics Essentials – Cisco Networking Academy (May 2026)
- Fundamentals of Docker & Kubernetes – Scaler (Jun 2025)
- DBMS Fundamentals & Advanced Concepts – Scaler (Oct 2025)
- Deloitte Australia Technology Job Simulation – Forage (May 2026)
- AI Tools & ChatGPT Workshop – BE10X (Jan 2026)
- Verilog HDL Fundamentals for Digital Design & Verification – Udemy (Nov 2024)

ADDITIONAL INFORMATION

Soft Skills: Communication & Team Collaboration | Problem Solving & Analytical Thinking | Leadership & Team Coordination | Adaptability & Continuous Learning | Attention to Detail | Time Management & Organization

Languages: English – Fluent | Hindi – Fluent | German – Basic

Extracurriculars: Technical Lead, Software Quality Assurance Community (SRMIST) | Head of Council, PSBB LLA (Grade 12)
